

Melancon Recently Secured Another Temporary Health Clinic in Venice for Ailing Workers
June 3, 2010

WASHINGTON D.C. – Thursday, U.S. Congressman Charlie Melancon (LA-03) will tour the first aid tent operated by West Jefferson Medical Center on Grand Isle. Congressman Melancon will meet with medical staff and talk to oil leak workers being treated at the clinic.

While on Grand Isle, Congressman Melancon will also meet with local small business owners and learn about the economic impact that the oil leak has had on their business.

Earlier in the day, Congressman Melancon will travel to Port Fourchon and tour the Emergency Operations Center with Lafourche Parish President Charlotte Randolph and local homeland security officials to discuss their BP oil disaster response needs.

Congressman Melancon has been leading efforts in Louisiana to coordinate the private, federal, state, and local response to the oil leak caused by the explosion on the Deepwater Horizon oil platform one month ago. He represents in Congress the areas of coastal Louisiana most directly affected by the oil leak, including Plaquemines, St. Bernard, Terrebonne, Lafourche and southern Jefferson Parishes. The Deepwater Horizon platform was located 50 miles off the coast of Louisiana's Third Congressional District.

Congressman Melancon has worked to bring federal attention to the health needs of Louisianians impacted by the oil leak in the Gulf. Tuesday, Congressman Melancon toured the newly opened mobile health care clinic in Venice, La., and met with the staff and patients. The mobile clinic, which Congressman Melancon [first requested May 19th](#), will treat and screen workers and residents affected by the BP oil leak in the Gulf. In his meeting last week with President Obama, Congressman Melancon again repeated this request. Later that day, Secretary of Health and Human Services (HHS) Kathleen Sebelius confirmed there would be a [federal commitment of health care services](#) for south Louisiana.

Congressman Melancon has asked the federal government for assistance in establishing temporary [mental health services](#) to help residents cope with the BP oil disaster in the Gulf. Congressman Melancon has hosted two recent town hall meetings in south Louisiana where he has heard from residents who are starting to display symptoms of depression, anxiety, and post-traumatic stress disorder.

Congressman Melancon has been working closely with parish and federal officials to monitor response efforts and provide assistance where needed. Last weekend, he [toured by boat](#) with Jean Lafitte Mayor Tim Kerner the marsh along Jefferson, Lafourche, and Plaquemines Parishes. He also met with Plaquemines Parish Sheriff Jiff Hingle and visited Buras to talk to workers involved in the oil leak containment and cleanup operations.

He has toured the coast along Terrebonne, Lafourche, Jefferson, and Plaquemines Parishes by helicopter with U.S. Coast Guard Captain Edwin. They surveyed the impact of the oil leak from the Deepwater Horizon disaster on the coastline west of the Mississippi River.

Congressman Melancon has toured by boat the coastal marshes in St. Bernard Parish with parish officials and viewed the efforts of local fishermen to deploy boom. He has also met with Terrebonne and Lafourche Parish officials and been briefed on their plans for boom deployment and other protective measures to prevent the oil sheen from damaging their coastal marshes. Over one million feet of protective boom have been deployed to protect Louisiana's fragile coastal marshes from the oil slick.

In his conversations with local fishermen and parish officials involved in laying the boom, Congressman Melancon learned they face a severe shortage in boom material, hindering their ability to protect the coast. In response, Congressman Melancon sent a letter to President Barack Obama [requesting military aircraft](#) be used to help bring protective boom to the Gulf Coast more quickly. The President granted his request and within a few days of receiving Congressman Melancon's letter, the first Air Force aircraft arrived in Belle Chasse with additional boom.

Congressman Melancon held a [town hall in Houma](#) to listen to constituent concerns about the oil leak disaster in the Gulf of Mexico and provide information about the response efforts. Congressman Melancon invited representatives from the Coast Guard, BP, the National Oceanic and Atmospheric Administration, the Small Business Administration, the Environmental Protection Agency, and officials from Terrebonne, Lafourche and St. Mary Parishes to take part in the town hall to help answer questions and listen to concerns.

Earlier this month, Congressman Melancon organized a [town hall in Chalmette](#) to share information with constituents about the oil disaster response efforts. Representatives from the Coast Guard, BP, the National Oceanic and Atmospheric Administration, Louisiana State University, Louisiana's seafood industry, and St. Bernard Parish officials answered questions and listened to concerns.
